Education

University of Nigeria, Nsukka

Bachelor of Science in Computer Science

2022 – 2026

Enugu state, Nigeria

Experience

LiteInnovations Consult

May 2025 – December 2025

Full-Stack Developer Intern

Ibadan, OYO State, Nigeria

- Built and deployed a full Learning Management System (LMS) using the MERN stack.
- Implemented authentication, course management, and payment workflows.
- Developed responsive UI components using React and Tailwind CSS.
- Collaborated with a team to debug, test, and optimize application performance .

Projects

FreelancePay | React, Node.js, Solidity, Hardhat, Celo, MetaMask

2026

- Built a Web3 escrow payment platform that enables secure milestone-based transactions between users.
- Developed and deployed Solidity smart contracts on the Celo Alfajores testnet using Hardhat.
- Integrated MetaMask wallet authentication and transaction signing for decentralized payment flows.
- Implemented AI-assisted workflow logic to automate parts of transaction handling and platform interaction.

Learning Management System (LMS) | MongoDB, Express.js, React, Node.js, Tailwind CSS

2025

- Built and deployed a full-stack Learning Management System during internship work at LiteInnovations Consult.
- Implemented authentication, course management, and payment-related backend workflows.
- Developed reusable and responsive frontend components using React and Tailwind CSS.
- Collaborated on debugging, testing, and performance optimization before product delivery.

BlitzQuiz | React, JavaScript, Node.js, Express

2026

- Developed a Blockchain quiz application from architecture through deployment.
- Implemented dynamic frontend interfaces for fast and responsive quiz experiences.
- Maintained structured Git workflows and documentation during the Techyjaunt Consistency Challenge.

Fraud Detection ML Model (Final Year school project - on-going) | Python, Machine Learning, Statistics

2026

- Designed an anomaly detection model for identifying suspicious prepaid electricity transactions.
- Applied statistical analysis and machine learning techniques to detect fraud patterns.
- Focused on real-world application within EEDC prepaid electricity transaction systems.

Technical Skills

Languages: JavaScript (ES6+), Python, Solidity, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Web3: Hardhat, Celo, MetaMask, Smart Contracts

Database: MongoDB

Developer Tools: Git, GitHub, VS Code

Achievements

Techyjaunt Consistency Challenge

2025, 2026

- Won the challenge two consecutive years for consistent project shipping, public progress tracking, and technical execution.

Celo Hackathon Participant

2026

- Built and pitched FreelancePay, a decentralized escrow payment platform.

Open Source Contributions

2026

- Contributed to issue-based open-source workflows, pull requests, and collaborative development.
